Subject: Final data package for TTPC analysis Eisenbarth Well Samples June 2015
[1506030031TTPC.pdf](#)

Good Afternoon Mr. Tink,

Please find attached the results from the split samples USEPA collected as part of the Monitoring Well sampling in June 2015. All results were below the reporting limit of 780 ng/L. USEPA did not sample for any other parameters as part of this sampling event. At your convenience, please provide a copy of Statoil's independent analysis once completed for comparison of TTPC results.

Please let me know if you have any additional questions or concerns.

Thank you,

JJ Justice
